**“INDUSTRY WORKSHOP ON PRACTICAL APPLICATION
OF PROCESS SAFETY MANAGEMENT —
LESSONS LEARNED AND INDUSTRY BEST PRACTICES”**

August 28, 2001

To all speakers and attendees:

Welcome to the PSM Best Practices seminar! I hope we have organized a very useful collection of speakers that will inspire all of you and help you to improve your process safety systems.

Given PSM is a performance standard, it is imperative that we establish systems based on best practices, and that we continually monitor and measure performance and make improvements as they are necessary. It is prudent to take advantages of new, proven approaches that become available and to benchmark others for perspective.

We intend that the format of the seminar is an interactive atmosphere to encourage sharing of process safety experiences and information. Our goal is to give the audience an opportunity to learn from the implementation experiences of other firms, and to share various techniques that might be effectively applied at your facilities.

Best regards,

David A. Moore, PE, CSP
